

Manufactured from 316 stainless steel and special engineering polymer selected for their corrosion resistance and resilience to flow erosion. Designed for operation on tap water to EU directive 98/83/EC without additive.

| SPECIFICATION |  |  |
| :---: | :---: | :---: |
|  | DN3 |  |
| Operating Pressure Range | 0.1 to 200 bar | 0.1 to 200 bar |
| Reverse Flow Adjustment L/min | 1 to 5 | $5-10$ |
| Max Flow rate L/min | 30 | 50 |
| Maximum Cv Value in flow <br> control direction | 0.02 | 0.62 |
| Feed Gallery Diameter | $6 m m$ | $6 m m$ |
| Porting | $1 / 4^{\prime \prime}$ BSP (Parallel) | $1 / 4^{\prime \prime}$ BSP (Parallel) |
| Construction Materials | A.I.S.I 316/Polymer | A.I.S.I 316/Polymer |
| Media | Water | Water |

## Dimensions

Free Flow Characteristics DN3

The hose burst valves allows free flow in both directions under normal operating conditions, however in the event of a hose burst the surge in flow from ' $B$ ' to ' $A$ ' the valve will immediately stop the flow locking pressure in 'B'. The valve can be reset by reversing the flow when the hose has been replaced. Reaction flow rate should be set to $1.5 \times$ maximum system flow rate.

The valve is supplied with an internally adjusted spring. This can be set by TWHC to the flow required.

## Free Flow Characteristics DN6
